Table 1: Agricultural Reserve East, Land Use Indicators (2024)

Characteristic	Value
Total area (acres)	42,476
Total development (square feet)	13,476,485
Key environmental indicators	
Parkland (acres)	6,830
Tree canopy cover (percent)	44.29
Key development types	
Office use (square feet)	23,963
Retail use (square feet)	44,944
Industrial use (square feet)	29,836
Other use (square feet)	622,411
Residential use (dwelling units)	4,367

Source: Montgomery Planning; Maryland State Department of Assessments and Taxation (August 2024).

Agricultural Reserve East is located in the northernmost corner of the county, bordering Frederick, Carroll, and Howard Counties. It is the second largest community by land area, and as part of the Agricultural Reserve, nearly half of ~~this community's~~ land is used for agricultural purposes. Additionally, a significant amount of parkland, over 6,800 acres, account for approximately 16 percent of the land area. Apart from ~~a couple~~ one grocery stores, a fire station, three public schools, ~~a fire station~~, and several places of worship, there are few other facilities and amenities in the area. Churches make up much of the 622,000 square feet of “other” land use listed in Table 1. Given its distance from the county's more urban areas, Agricultural Reserve East does not have direct access to the region’s Metro or commuter rail networks.

Community Trends Profile DRAFT

People

Home to 12,553 residents in 2022, Agricultural Reserve East was the second least densely populated community with 192 persons per square mile. While ~~little population growth has occurred~~ population growth has remained flat since 2010, the population has aged considerably, with declining numbers of children and a fast-growing elderly population. By 2022, the elderly outnumbered children (see [Table 4 and Figure X](#)). The number of residents ages 65 and over grew by 127 percent, doubling their share of the population between 2010 and 2022. Children under age 18 became a smaller percentage of the population, and the 3 percent of the population who were young children (under age 5) in 2022 was one of the lowest percentages in the county. However, many other aspects of the community remained relatively ~~little~~ unchanged. ~~The While the~~ White population continued to be the largest racial/ethnic group, ~~with~~ the Hispanic population was the fastest-growing group, increasing by 116 percent. More than half of residents ages 25 and over had at least a bachelor's degree. The vast majority of households (~~more than 8082~~ percent) were families, but the percentage of households with children decreased from 38 percent to 25 percent, reflecting the community's declining numbers of children over the past decade. Approximately one-third of households earned less than \$100,000 and another one-third earned \$200,000 or more. Related to its lack of access to public transit and greater reliance on automobiles, Agricultural Reserve East had ~~one of thea very~~ very smallest percentages of workers with a car-free commute.

Commented [CM2]: Looks good!

Commented [CM3]: For each profile, we should include the population growth rate.

Commented [JL4R3]: For many CTAs, the growth rate is not statistically significant. How should we handle this?

Commented [5R3]: Then say the growth rate has been flat.

Community Trends Profile DRAFT

Housing

The housing stock in Agricultural Reserve East is almost entirely single-family detached homes. Of the existing housing units, 95 percent were built before 2010. In line with the prevalence of single-family detached units, this community had one of the highest homeownership rates of any community in the county, with 94 percent of all households living in owner-occupied homes. Between 2010 and 2016, average home values in this area decreased by \$119,000, or 17 percent. Yet, by 2022, housing values returned to previous levels, reaching an average of \$873,000. Since 2010, both average home values and owner costs in Agricultural Reserve East have continued to exceed county averages.

Commented [CM7]: For order, this table would make more sense after table 11 because it also focuses on structure characteristics. Need to add year of the data to the column heading or table title so the fact that the data is from 2024 is more pronounced and to be consistent with the other tables.
