Resource Count: 1

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Roy Wilson Property is a 2-story, 3-bay vernacular house on the south side of Sherview Lane in the Fairland area of Silver Spring, Montgomery County. Constructed circa 1910, the building is a front gable house with additions.

The structure has a front gable, asphalt shingle roof with a brick chimney at the south gable of the original building. It is of wood frame construction with wood lapboard siding and it has a stuccoed, concrete masonry foundation. The windows are double-hung aluminum sash. The house has a hipped roof porch on the east elevation. The porch has wood posts and a wood floor on concrete blocks.

The east, or front, facade of the original house has a porch, a 1½-story addition to the south, and a 2-story addition to the west. The basement level has no windows. The first story entrance, located at the southeast bay of the original house, is a 6-light wood door and with an aluminum storm door. The fenestration pattern is symmetrical with one 1/1 window on the first story. The second story has two 1/1 windows and a window opening in the gable peak. The windows have wood and plastic shutters.

The north elevation has a vertical wood batten at the joint where the original house and the 2-story addition are joined. The roof of the 2-story addition is slightly higher than the original house roof. There is a centered wood paneled door and a wood storm door with 8 lights. The fenestration pattern is asymmetrical with one 3-light fixed sash window on the basement level and 2 1/1 double-hung windows on the first story. The second story has 3 1/1 double-hung windows. Alterations to the elevation include aluminum siding on the soffits.

The west, or rear, elevation of the original house is not visible. The west elevation of the 2-story addition is wider than the original house. The roof pitch at the south gable of the addition is different from the pitch of the original gable roof. The fenestration pattern is asymmetrical, with one 3-light fixed sash window on the basement level and two 1/1 double hung windows on the first story. The second story has two 1/1 windows and an attic vent in the gable peak. Alterations to the elevation include aluminum siding on the soffits.

The south elevation of the original house is not visible. The south elevation of the 2-story addition has a fenestration pattern that is irregular, with one 1-light fixed sash window on the basement level and one 1/1 double-hung window on the first story. There is a centered metal double door with 18 lights each. The second story has two 1/1 windows and a large fixed window from the floor level to the roof eave. Alterations to the elevation include aluminum siding on the soffits.

The south elevation of the 1½-story addition has a fenestration pattern is irregular, with one 1/1, double-hung window and an attic vent in the gable peak. The west elevation of the addition has one 1/1 double-hung window with shutters. The east elevation of the addition has a double awning window on the first story and shed dormer adjacent to the original house. The dormer has one 1/1 double-hung window.

ADDRESS: 2709 Sherview Lane, Silver Spring, Montgomery County

7. Description (Continued)

The 1½-story addition has an enclosed porch to the south. The porch has a hipped roof with exposed rafters. The south elevation of the porch has one 1/1 double-hung window and four 6-light wood casement windows. The east elevation of the porch has a 6-light wood door and a 6-light wood casement window.

There are no outbuildings associated with this building.

The property is located on south side of Sherview Lane with residential property to the north, south, east and west. There are many old trees on the property. This site is level, and its setting is suburban residential.

Prepare both a summary paragraph of significance and a general statement of history and support.

The location of the Roy Wilson Property is shown on the 1865 Martenet and Bond map, and the 1879 Hopkins atlas, as the Benjamin Marlow house and farm. Deeds indicate that Benjamin Marlow and his wife conveyed property to Harriet E. Roby in September and December, 1899. The earliest references to the property are three related deeds. Odorion W. Roby acquired 0.63 hectares (1.56 acres) of land from Harriet E. and Thomas J. Roby in May 1907, and then sold that land to Roy H. Wilson in February 1910. In March 1907, Thomas J. and Harriet E. Roby conveyed 15.43 hectares (38.12 acres) of adjacent land to Roy Haywood Wilson and Carrie F. Roby Wilson. The Wilsons owned the land until December 1924, during which time the original house was constructed. Joseph W. Edwards acquired the land from the Robys in 1924, and in July 1936, Joseph W. and Marguerite M. Edwards conveyed 0.48 hectares (1.18 acres) of that land to William A. and Mary Ellen Collins. Margaret E. Sherwood acquired the land from the Collins' in September 1939. Pearl Roby subsequently inherited the land from Margaret E. Sherwood, and in August 1974, Robert E. Bullard, Trustee for Pearl Roby, et al, conveyed 0.25 hectares (0.62 acres) of land to Bruce A. and Linda Marie Rahn. The Rahns are the current owners.

The Roy Wilson Property is located on Sherview Lane, west of Old Columbia Pike, in the Fairland area of Silver Spring. The property is on land originally patented to Archibald Edmonston in 1720 as "Deer Park" in what was then Prince George's County. "Deer Park" was grant of 276 hectares (682 acres) of land between the Paint Branch and Little Paint Branch, and from approximately Randolph Road to Briggs Chaney Road (Boyd 1879: 38).

During the early settlement period, both Prince George's and Montgomery counties had an agriculture-based economy. Directly or indirectly, every resident earned his livelihood from the land and its yield. When Prince George's County was formed in the late seventeenth century, colonists had already begun to clear native forests for fields. Tobacco was the region's principal cash crop, and the economy revolved around its production.

Although tobacco was the heart of an agricultural economy, the area was not entirely devoid of industry. Some iron was mined and worked in the Upper Patuxent region (M-NCPPC 1993:9), and the Snowden Iron Works was one of the successful business endeavors of the Snowden family. Although secondary to tobacco, grains were an important crop in both Prince George's and Montgomery counties. Land in the northern regions of Prince George's County, for example, was particularly suited to the production of grain. Grist mills which ground wheat into flour and corn into meal were important facilities, and water powered mills were built on the various tributaries of the Patuxent and Potomac rivers (M-NCPPC 1993:16).

8. Significance (Continued)

By the 1870s the "Gilded Age" (1870-1895) of materialism was beginning. It was during this period of massive land speculation and radical changes in the traditional methods of transportation that the phenomenon known as suburbanization was born. Beginning in the 1880s, the economy of Montgomery and Prince George's counties began to shift away from agriculture, becoming increasingly more dependent upon the federal government and the jobs it provided (M-NCPPC 1993:25). The combined influences of an expanding capital city, speculative developers, and easier, more convenient modes of transportation stimulated suburban growth in both Montgomery and Prince George's counties. However, Fairland was far enough away from the District of Columbia to remain a small and rural community. In the decades after the Civil War, Fairland had a population of about 50 people, an Episcopal church, a schoolhouse, and a store.

The "motor car", first manufactured for sale in 1895, prompted expansive economic and social changes after the turn of the century. The automobile and an improved system of roads offered further opportunity for suburban expansion; new communities appeared, in some cases quite distant from railroad and streetcar lines. Although Fairland remained a small community until after the Second World War, development occurred along the Columbia Pike. The historic crossroads of Fairland has been replaced by modern development.

The Roy Wilson Property is a 2-story, front gable vernacular cottage. Between 1870 and 1940 the vernacular cottage style was typically built for Americans of modest means. They are characterized by simple ornamentation and mass-produced components, such as door frames, moldings, sash and window units, and porch decoration. The development of post-Civil War machinery capable of producing large amounts of standardized housing elements, such as those found in cottages, contributed greatly to the development of the modern American housing industry. Designs for vernacular cottages were obtained from popular magazines, such as House Beautiful, or carpenter's and builder's journals, such as American Builder. A variety of front-gabled frame cottages were developed in the early to mid-twentieth century. Front gable cottages are one to two stories tall, 3 bays wide and several rooms deep.

8. Significance (Continued)

NATIONAL REGISTER EVALUATION:

Constructed circa 1910, the Roy Wilson Property is not eligible for the National Register. The property is not eligible under Criterion A; no significant events have been determined to be associated with the property. The property is not eligible under Criterion B; no person significant in local, state, or national history has been determined to be associated with the property. The property is not eligible under Criterion C; the house is a vernacular house that does not embody distinctive characteristics of a particular style, and the original house has been compromised by extensive alterations. The alterations have changed the original house form, massing, and orientation. The property is not eligible under Criterion D; the house is a vernacular house of standard building techniques and is not likely to yield significant information.
