Ottery report approx (verify)

Additional Information:

The area of the cemetery appears to have been disturbed, probably by construction of nearby development. There is evidence of bulldozer push piles around the site. There are large fieldstones that might once have been used as grave markers, but these are unlikely to be in their original positions. There are no unambiguous grave markers on site. There are depressions in the ground, whether these may be related to graves or construction disturbance is unknown.
