Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

Spring Gardens Apartments consists of a complex of four U-shaped, four-story, brick buildings which contain 169 apartment units. The complex is located on Eastern Avenue, but its primary axis runs perpendicular to the Avenue, and the courtyards created by the buildings are inward turning. A secondary axis, perpendicular to the primary one, runs between the two pairs of buildings. Courtyards and axes are well landscaped, providing a rich contrast of soft forms against the angular solidity of the buildings.

Considerable attention was paid to the design of the building facades. The four-story blocks are made less monolithic by the use of shallow setbacks, which give a vertical emphasis, and thin belt courses that run along the tops and bottoms of the window openings, giving a contrasting horizontal emphasis. Beneath the first floor windows the belt course is more elaborate, consisting of a soldier course of brick between two slightly projecting, single courses of brick. Within the setbacks, the spandrel panels beneath the center windows consist of bricks set on end at an angle to give a chevron pattern.

Liberal use is made of corner windows which, until recently, contained metal casement sash. These have now been replaced with new, insulated windows of an indeterminate style. A metal coping tops the roof parapet and embellishes it at intervals with a three-part, stylized crown.

Four doorways from the courtyards give access to the apartments via interior staircases that serve a small number of units. These doorways are embellished with limestone surrounds which take the form of smooth, layered panels rising well above the door. Immediately over the door a moulded limestone marquee with rounded corners projects from the wall to form a sheltering roof. Above the marquee are limestone ornamental panels containing low-relief, geometric designs. The doorways contain solid, flush doors with a single large round window in the upper half. The door handle is a geometric design consisting of a half circle pierced by a horizontal bar. Extending upwards above the entryway for two levels is a tall panel of glass block, interrupted by a spandrel panel and two small casement windows.

Montgomery Arms on Colesville Road at Fenton Street, Silver Spring, are the only two to use this style that remain.¹ McAlesters' *A Field Guide to American Houses* defines this style as a mixture of Art Moderne and Art Deco.² Spring Gardens contains such Art Moderne elements as corner windows, glass block, a flat roof with a distinct coping, round-cornered marquees, and thin string courses to emphasize the horizontal. It also utilizes the Art Deco elements of stylized and geometric designs for ornamental panels and doors, including their hardware, chevron-patterns in the brick, elaborate door surrounds, symmetry, and multiple setbacks to emphasize the vertical. The McAlesters make the point that, while houses of this era were influenced predominantly by the streamlines of Art Moderne, "In most [commercial] building types, both the horizontal, streamlined Art Moderne and the vertical, zigzagged Art Deco influences occur in combination."³ Spring Gardens is an excellent example of this. Since very little of this type of architecture has survived in Montgomery County, Spring Gardens is now even more important as a rare example of this style.

The four buildings of Spring Gardens Apartments are located on Lots 1, 2, and 3, Block A of Spring Garden Subdivision. This subdivision was platted on March 12, 1941 (Plat 22/1368) by the North Washington Housing Corporation. On the same day, Morris Miller and his wife Minnie sold those three lots to Spring Gardens, Inc., a corporation whose president was Morris Miller; the secretary was his son, Louis. Nine months later, on December 30, 1941, Spring Gardens, Inc. sold the property back to Morris and Minnie Miller, Louis Miller, and Ida Miller Furr. Tax assessment records for 1941 show these three lots with no improvements on them (a house valued at \$2,500 had been demolished that year and a credit given for its value). In 1942 the improvement value for these three lots is given as \$422,000, and the words "Apt. House" are marked on the entry. Since the Klinge Atlas of 1941 shows these apartments, they must have been built or significantly completed by 1941.
