EXPEDITED MONTGOMERY COUNTY HISTORIC PRESERVATION COMMISSION STAFF REPORT

Address:

119811 Darnestown Road, Beallsville

Meeting Date: 12/5/12

Applicant:

Montgomery County Department of Parks

Report Date: 11/28/12

(Julie Mueller, Agent)

Resource:

Contributing Resource

Beallsville Historic District

Public Notice: 11/21/12

Review:

HAWP

Tax Credit:

None

Case Number: 17/01-12B

Staff:

Anne Fothergill

PROPOSAL: Tree removal

STAFF RECOMMENDATION

☑ Approval

✓ Approval with conditions

PROPERTY DESCRIPTION

SIGNIFICANCE: Darby Store - Contributing Resource within the Beallsville Historic District

STYLE:

Vernacular

DATE:

1910

See building's history and description in Circles _______.

PROPOSAL

The applicant proposes to remove to remove a 10" Oriental Spruce (not Norway Spruce as noted) that is leaning towards the historic store building, which was recently relocated and renovated.

The applicant also proposes to remove a 24" pine in front of the historic house that a certified arborist determined to be dead - HPC approval is not required to remove dead trees.

APPLICABLE GUIDELINES

Montgomery County Code; Chapter 24A-8

- (a) The commission shall instruct the director to deny a permit if it finds, based on the evidence and information presented to or before the commission that the alteration for which the permit is sought would be inappropriate, inconsistent with or detrimental to the preservation, enhancement or ultimate protection of the historic site or historic resource within an historic district, and to the purposes of this chapter.
- The commission shall instruct the director to issue a permit, or issue a permit subject to such conditions as are found to be necessary to insure conformity with the purposes and requirements of this chapter, if it finds that:

- (1) The proposal will not substantially alter the exterior features of an historic site or historic resource within an historic district; or
- (2) The proposal is compatible in character and nature with the historical, archeological, architectural or cultural features of the historic site or the historic district in which an historic resource is located and would not be detrimental thereto or to the achievement of the purposes of this chapter; or
- (3) The proposal would enhance or aid in the protection, preservation and public or private utilization of the historic site or historic resource located within an historic district in a manner compatible with the historical, archeological, architectural or cultural value of the historic site or historic district in which an historic resource is located; or
- (4) The proposal is necessary in order that unsafe conditions or health hazards be remedied; or
- (5) The proposal is necessary in order that the owner of the subject property not be deprived of reasonable use of the property or suffer undue hardship; or
- (6) In balancing the interests of the public in preserving the historic site or historic resource located within an historic district, with the interests of the public from the use and benefit of the alternative proposal, the general public welfare is better served by granting the permit.
- (c) It is not the intent of this chapter to limit new construction, alteration or repairs to any 1 period or architectural style.
- (d) In the case of an application for work on an historic resource located within an historic district, the commission shall be lenient in its judgment of plans for structures of little historical or design significance or for plans involving new construction, unless such plans would seriously impair the historic or architectural value of surrounding historic resources or would impair the character of the historic district. (Ord. No. 9-4, § 1; Ord. No. 11-59.)

STAFF RECOMMENDATION

Staff recommends that the Commission <u>approve</u> the HAWP application as being consistent with Chapter 24A-8(b) (1);

and with the general condition that the applicant shall present the 3 permit sets of drawings to Historic Preservation Commission (HPC) staff for review and stamping prior to submission for the Montgomery County Department of Permitting Services (DPS) building permits;

and with the general condition that the applicant shall notify the Historic Preservation Staff if they propose to make any alterations to the approved plans. Once the work is completed the applicant will contact the staff person assigned to this application at 301-563-3400 or anne.fothergill@mncppc-mc.org to schedule a follow-up site visit.

DP8 - #2

Darby Tree Removal HAWP Application

1.a Description of existing structure and environmental setting, including its historical features and significance.

Environmental Setting: The Darby House and Store (19811 and 19801 Darnestown Road, respectively) are located within the Darby Historical/Cultural Park, which is composed of 25.5 acres located at the northwest intersection of Routes 109 and 28 in Beallsville. The park is part of the Agricultural Reserve. The property was purchased in 2004 for its cultural resources and open space. The Darby House, Darby Store, and detached garage are contributing resources within the locally designated Beallsville Historic District. The front portion of the park facing Route 28 is protected under the "environmental setting" of the Beallsville Historic District. In June 2011, for safety and preservation purposes, the store was moved back and away from the intersection (HAWP 506356).

History: The following information is taken from Places from the Past: The Tradition of Gardez Bien in Montgomery County, Maryland:

The [house and store] show the relationship between business and residence, and the prominence of the local merchant in a rural, turn-of-the-20th-century farming community. The Darby Store, a country store at the heart of historic Beallsville, was built in 1910 by H. C. Darby. Beallsville had evolved into an important crossroads from its beginnings when the B&O's Metropolitan Branch line of 1873 resulted in the nearby Sellman Station. Activity there brought increasing commerce to Beallsville, culminating in this pair of notable structures from the first decades of the 20th century. The store epitomizes the vernacular, two-story, front-gabled form that was common for general stores in the region around the turn of the century. By the 1920s, the store featured the area's post office as well.

The adjacent H.C. Darby House was built by the store's owner in 1921 [replacing his original residence which was located behind the store facing Beallsville Road]. It is a spacious house that exhibits the Colonial Revival style, with lingering remnants of the Queen Anne. The house is a two-story, white clapboard structure with three bays, a hipped roof, and side gables on each elevation. A one-story porch, supported by pairs of classical columns, stretches across the width of the main and east elevations. There is a two-story projecting bay at the east corner of the front elevation. The house's size reflects the economic importance of the merchant in small communities like Beallsville.

The pair of properties continued to be owned and operated by the Darby family throughout most of the 20th century. The store was run by H.D. Darby, the original owner's son, after the father retired. The continuity of the property's ownership is significant.

Exterior Description: Located at the northwest corner of Darnestown and Beallsville Road, the Darby Store is a symmetrical, one-bay wide, two-story, balloon-frame structure measuring 54'4" x 24'6". The building is sheathed in horizontal, wood siding. It has a new metal shingle, pitched roof with a slight eave, and a simple, flat band of trim. Windows are double-hung, two-over-two sash throughout with

the exception of the attic window on the south elevation. This window has a tripartite design with the center window being slightly taller than the two surrounding windows. There are five doors into to the building. The single, front door on the south elevation is centered between large sets of plate glass windows. It consists of a four-paneled base below a glazed section. It is topped by a glazed transom on which the letters "H.C. Darby" are painted. On the west elevation is a single, paneled door leading into the back of the front room. On the north elevation is a frame door leading down into the cellar. The east elevation has one, door near the back of the building that leads into a back room. Immediately above it, on the second floor, is a five-paneled door that is not accessible from the ground.

1.b. General Description of the Project and Its Effect on the Historic Resources, the Environmental Setting, and the Historic District.

Project Description: Remove two trees.

- A 10"-wide Norway Spruce is immediately adjacent to the new location of the store. Because it is also leaning towards it and because its root system was compromised with the construction of the new foundation for the store, Parks would like to remove the tree to prevent it from possibly falling into the newly stabilized structure. The stabilization included installing a new roof, repairing siding, and reconstructing the front porch which had been demolished by a truck many years ago. Were the tree to fall into the building, it would severely damage the newly completed work.
- An almost dead 24+" pine is located in front of the Darby House. Parks would like to remove it before it damages the house.

Effect on Historic Resources: There will be no adverse effect on the historic resource. Removing the tree will help avoid potential damage to the building.

Effect on Environmental Setting: There will be no effect on the environmental setting. The pair of historic trees located at either end of the front of the property and which were probably planted in 1921 when the house was built will not be affected by the removal of this tree.

Effect on Historic District: The undertaking will not diminish the integrity of design, setting, materials, workmanship, feeling, or association.

- 2. Site Plan: See attached Proposed Site Plan (June 3, 2009). This plan shows the original and proposed location of the store, prior to its move. The store is now in the "proposed" location and the "existing" location is the former location.
- 3. Plans and Elevations: N/A
- 4. Materials Specification: N/A
- 5. Photographs: (see attached)
- 6. Tree Survey: See attached site plan for location of existing trees.

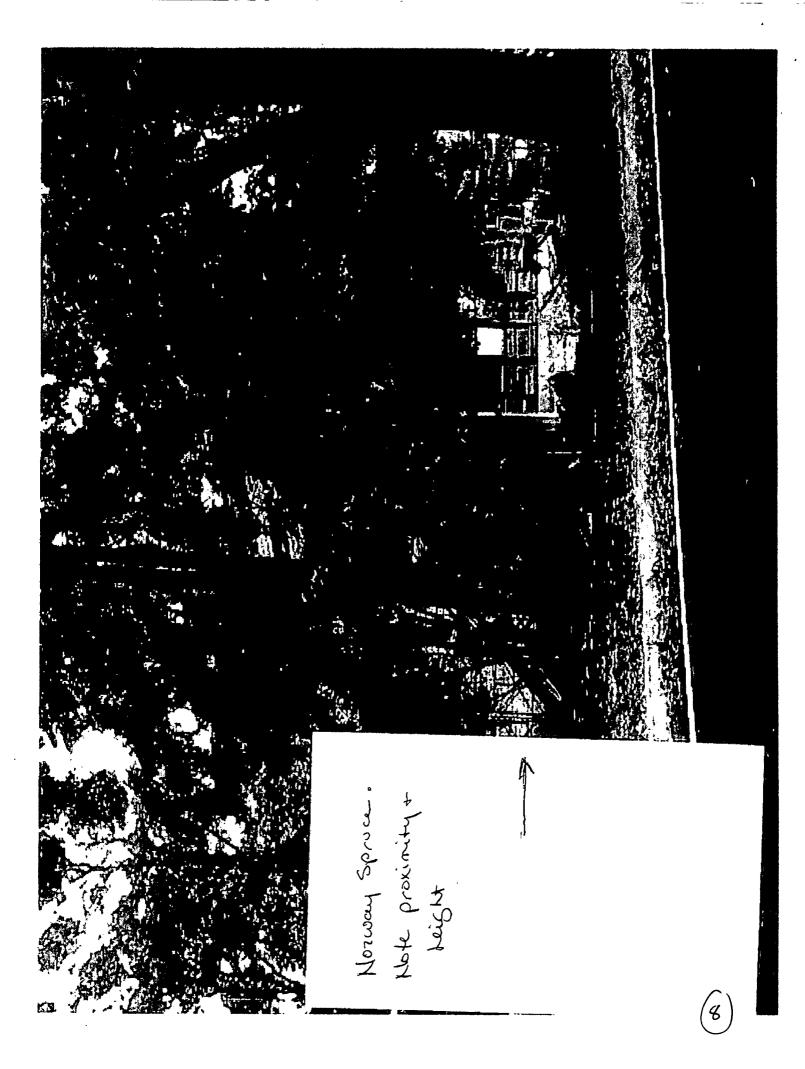

7. Addresses of Adjacent and Confronting Property Owners: (see attached map and real property data sheets, summarized below)
