

35/13-95A

Erosion Control Notes

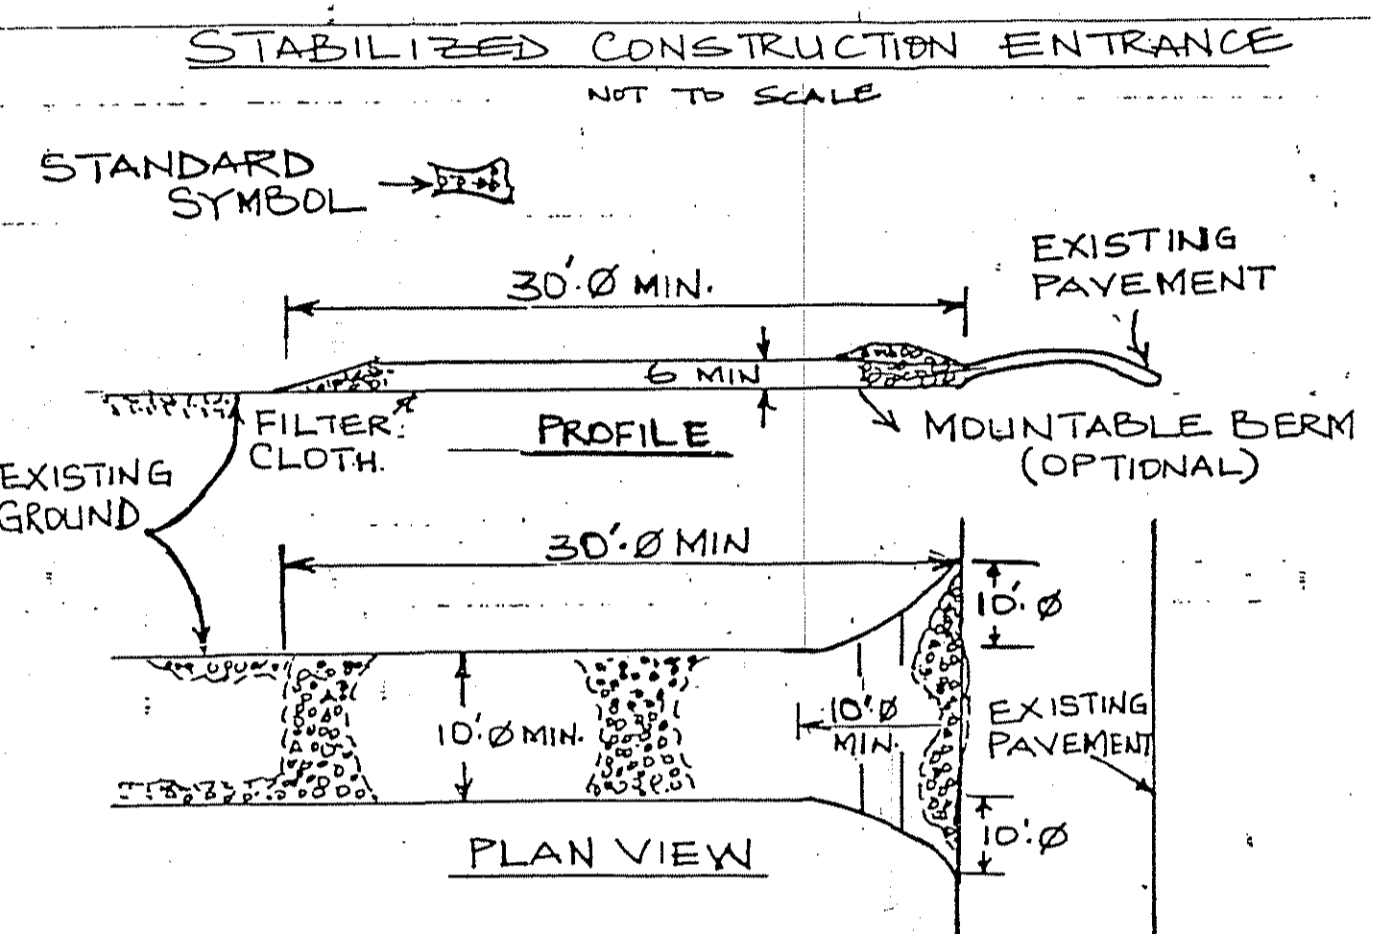

- Sediment and erosion control methods shall be installed before the start of any excavation and / or construction as per Standards and Specifications for Soil Erosion and Sediment control for Montgomery County and the Village of Chevy Chase. If an on-site inspection reveals further erosion control measures are necessary, the same shall be provided.
- All debris is to be removed from site.
- Streets and sidewalks shall be swept clean at all times during excavation and construction.
- All catch basins, dry wells, trenches, and drain areas shall be protected during excavation and construction.
- If any catch basins or drains become clogged as a result of excavation or construction, the contractor shall be responsible for its cleaning.
- Any stockpiling, regardless of location shall be stabilized and covered with plastic, or canvas, after its establishment and for the duration of the project.

STRAW BALE DIKE

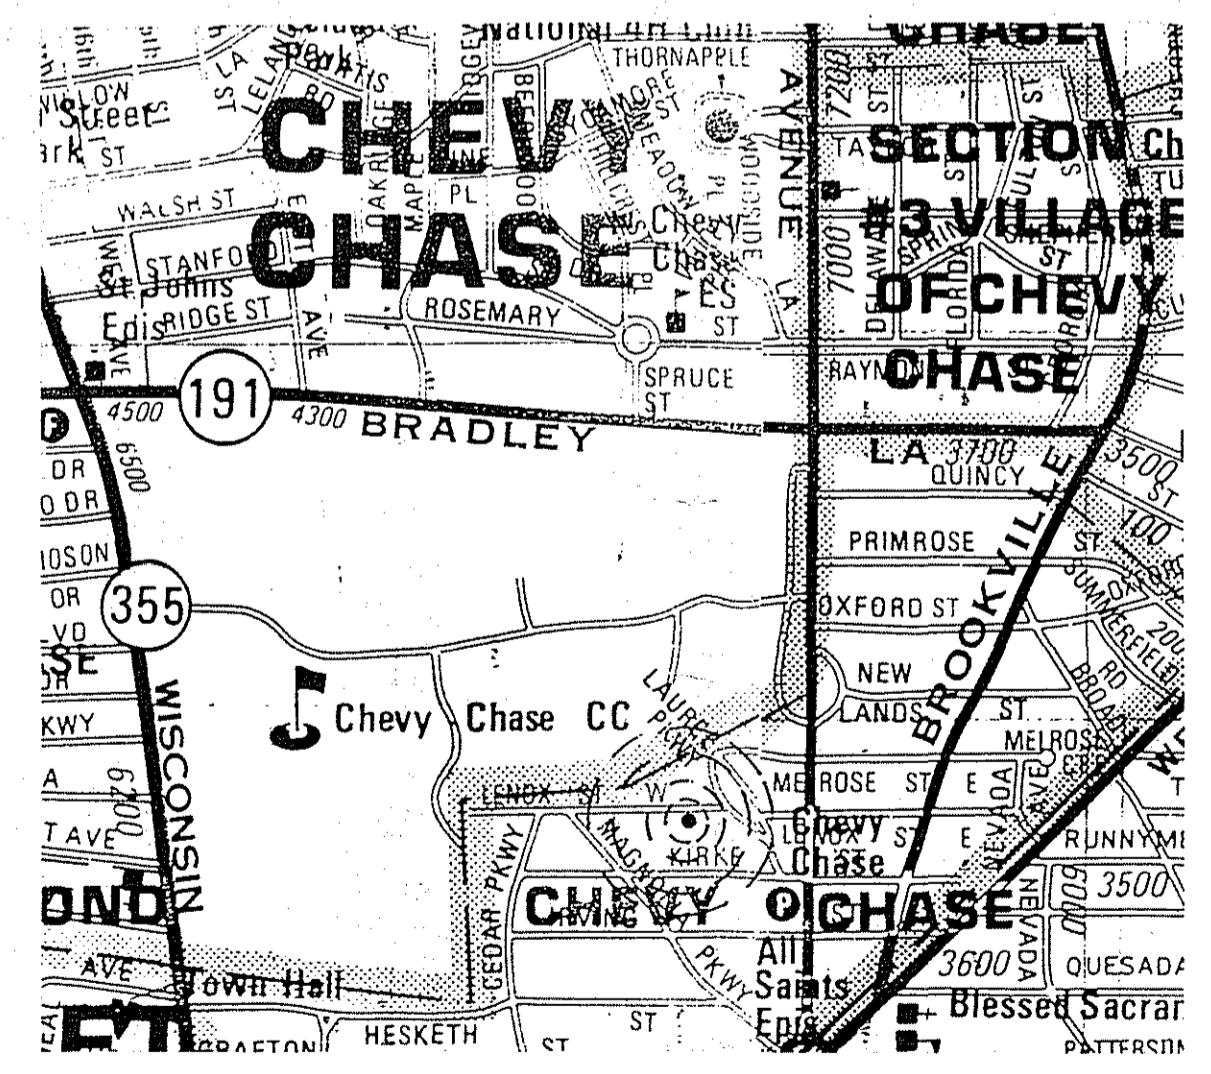

- Bales shall be placed in a row with ends tightly abutting the adjacent bales.
- Each bale shall be securely anchored in a place by stakes or re-bars driven through the bales. The first stake in each bale shall be anchored toward the previously laid bale to force the bales together.
- Each bale shall be imbedded in the soil a minimum of 4".
- Inspection shall be frequent and repair or replacement shall be made promptly as needed.

STABILIZED CONSTRUCTION ENTRANCE

- Stone size - 2" stone, reclaimed or recycled concrete equivalent.
- Length - as required, but not less than 30 feet.
- Thickness - not less than 6".
- Width - 10 foot minimum.
- Periodic and needed maintenance shall be provided after rain.
- Washing - wheels shall be cleaned to remove sediment prior to entrance onto public right-of-way. When washing is required, it shall be done on an area stabilized with stone and which drains into an approved sediment trapping device

Notes

1. Mechanical plans indicate general duct layout only. Sizes and specific configurations to be as required by codes and generally accepted HVAC practices for premium residential construction.
2. Double ducts to be run where framing cavities are inadequate for required air flow.
3. All duct work to have exterior insulation.
4. Additional specifications and notes are indicated in the general notes.
