Waters barn (demolished).

The Commission found that these sites did not meet any of the criteria of the Ordinance, and therefore, it recommends that they not be added to the Master Plan.

Owners of these sites were not notified due to the difficulty in locating accurate legal descriptions and premise addresses. Planning Board staff has indicated that notice of your public hearing will be advertised. Our legal council has advised us that such notification is sufficient.

The Commission will have a representative attend your public hearing and work session on these sites. Please do not hesitate to call either Bobbi Hahn or myself in the interim if we can provide any additional information.

Sincerely,

Susan Kuklewicz, Chairwoman
Historic Preservation Commission

The motion was seconded by Mr. King. Those in favor: Mr. Patterson, Mr. King, Ms. McGuckian, Mrs. Kuklewicz, Mr. Edson. Opposed: Mr. McConihe who maintained that insufficient study has been given to the matter. The motion carried.

2. Ruins and Outbuildings

Ms. McGuckian went through the pictures and research on the following sites, listed by the park Historian as 'ruins' and 'outbuildings only,' and which the HPC subcommittee had visited and were recommending against placement on the Master Plan: 13/31 William Burdette; 15/48 Chimney ruins; 17/5 Darby farm; 15/25 Doyle log house; 23/30 Charles Griffith; 14/9 Griffith double log (demolished); 17/43 Jarboe ruins; 19/12 Log cabin - Middlebrook Road; 23/83 Log house ruins; 15/57 Murphy's Ford/log house; 17/51 Padget farm; 13/17 Purdum house; 24/28 Seneca C.M.E. Waters barn (demolished).

MOTION: Ms. McGuckian moved that it be recommended to the Planning Board that the above listed sites should not be placed on the Master Plan because they did not meet any of the criteria of the Ordinance. Mr. Patterson seconded the motion which passed unanimously.

II. Hearings on Historic Area Work Permits

1. Mrs. Hahn reviewed the plans for new construction at 2813 Beechbank Road, Silver Spring, which is within the Capitol View Park historic district, as presented to the Commission at its November 3, 1983 meeting by owner/developer Richard Pokrass. The Local Advisory Committee had recommended adoption of the plans as presented with the condition that no additional trees be removed.

MASTER PLAN AMENDMENT PROCESS

Master Plans provide policy guidance concerning the private and public use of land, for use and reference by private landowners, public agencies, and interested parties generally. Every master plan amendment also amends the General Plan for Montgomery County. The process of initiation, review, and adoption of amendments is generally as follows:

Preliminary Draft Amendment

This document is a formal proposal to amend an adopted master plan. It is prepared by the Montgomery County Planning Board of The Maryland-National Capital Park and Planning Commission. Before proceeding to publish a final draft amendment, the Planning Board must hold a public hearing. After the close of the record of this public hearing, the Planning Board holds an open worksession to review the testimony, and to determine whether to make any revisions to the preliminary draft.

Final Draft Amendment

This document contains the Planning Board's final recommendations. It is transmitted to the County Executive, who must review it and forward it to the County Council, with any revisions deemed appropriate. If the County Executive makes no revisions in the Planning Board's final draft, the Council may adopt the unchanged draft without holding a public hearing. If the Executive does make revisions, or if the Council wishes to consider any revisions, the Council must schedule a public hearing. After the close of record of this public hearing, the Council holds an open worksession to review the testimony, and then adopts a resolution approving, modifying, or disapproving the final plan amendment.

If the Council action modifies and approves the Executive's Revised Final Draft Amendment, the Approved Amendment must be sent to the County Executive for approval or disapproval. If disapproved by the County Executive, the Council may override the disapproval of the Plan by an affirmative vote of five members.

Failure of either the County Executive or the Council to act within the prescribed time limits constitutes approval of the plan amendment as submitted to the body which fails to act.

Adopted Amendment

The amendment approved by the County Council is forwarded to the Maryland-National Capital Park and Planning Commission for adoption. Once adopted by the Commission, the amendment officially amends the various master plans cited in the Commission's adoption resolution.

HISTORIC PRESERVATION MASTER PLAN AMENDMENT

The Master Plan for Historic Preservation and the Historic Preservation Ordinance, Chapter 24A of the Montgomery County Code, are designed to protect and preserve Montgomery County's historic and architectural heritage. When an historic resource is placed on the Master Plan for Historic Preservation, the adoption action officially designates the property as an historic site or historic district, and subjects it to the further procedural requirements of the Historic Preservation Ordinance.

Designation of historic sites and districts serves to highlight the values that are important in maintaining the individual character of the County and its communities. It is the intent of the County's preservation program to provide a rational system for evaluating, protecting and enhancing the County's historic and architectural heritage for the benefit of present and future generations of Montgomery County residents. The accompanying challenge is to weave protection of this heritage into the County's planning program so as to maximize community support for preservation and minimize infringement on private property rights.

The following criteria, as stated in Section 24A-3 of the Historic Preservation Ordinance, shall apply when historic resources are evaluated for designation on the Master Plan for Historic Preservation:

(1) Historical and cultural significance:

The historic resource:

- a. has character, interest, or value as part of the development, heritage or cultural characteristics of the County, State, or Nation;
- b. is the site of a significant historic event;
- c. is identified with a person or a group of persons who influenced society;
- d. exemplifies the cultural, economic, social, political or historic heritage of the County and its communities; or

(2) Architectural and design significance:

The historic resource:

- a. embodies the distinctive characteristics of a type, period or method of construction;
- b. represents the work of a master;
- c. possesses high artistic values;
- d. represents a significant and distinguishable entity whose components may lack individual distinction; or
- e. represents an established and familiar visual feature of the neighborhood, community, or County due to its singular physical characteristic or landscape.

IMPLEMENTATION OF THE MASTER PLAN FOR HISTORIC PRESERVATION

Once designated on the Master Plan for Historic Preservation, historic sites are subject to the protection of the Ordinance. Any substantial changes to the exterior of a site or its environmental setting must be reviewed by the Historic Preservation Commission and an historic area work permit issued under the provisions of the County's Preservation Ordinance, Section 24A-6. In accordance with the Master Plan for Historic Preservation and unless otherwise specified in the amendment, the environmental setting for each site, as defined in Section 24A-2 of the Ordinance, is the entire parcel on which the resource is located as of the date it is designated on the Master Plan.

Designation of the entire parcel provides the County adequate review authority to preserve historic sites in the event of development. It also ensures that, from the beginning of the development process, important features of these sites are recognized and incorporated in the future development of designated properties. In the case of large acreage parcels, the amendment will provide general guidance for the refinement of the setting by indicating when the setting is subject to reduction in the event of development; by describing an appropriate area to preserve the integrity of the resource; and by identifying buildings and features associated with the site which should be protected as part of the setting. It is anticipated that for a majority of the sites designated, the appropriate point at which to refine the environmental setting will be when the property is subdivided.

Public improvements can profoundly affect the integrity of an historic area. Section 24A-6 of the Ordinance states that an Historic Area Work Permit for work on public or private property must be issued prior to altering an historic resource or its environmental setting. The design of public facilities in the vicinity of historic resources should be sensitive to and maintain the character of the area. Specific design considerations should be reflected as part of the Mandatory Referral review processes.

In the majority of cases, decisions regarding preservation alternatives are made at the time of public facility implementation within the process established in Section 24A of the Ordinance. This method provides for adequate review by the public and governing agencies. In order to provide guidance in the event of future public facility implementation, the amendment addresses potential conflicts existing at each site and suggests alternatives and recommendations to assist in balancing preservation with community needs.

In addition to protecting designated resources from unsympathetic alteration and insensitive redevelopment, the County's Preservation Ordinance also empowers the County's Department of Environmental Protection and the Historic Preservation Commission to prevent the demolition of historic buildings through neglect.

The Montgomery County Council passed legislation in September 1984 to provide for a tax credit against County real property taxes in order to encourage the restoration and preservation of privately owned structures located in the County. The credit applies to all properties designated on the Master Plan for Historic Preservation (Chapter 52, Art. VI). Furthermore, the Historic Preservation Commission maintains up-to-date information on the status of preservation incentives including tax credits, tax benefits possible through the granting of easements on historic properties, outright grants and low-interest loan programs.

THE AMENDMENT

The purpose of this amendment is twofold. First, it is to designate two historic properties to be protected under the County's Historic Preservation Ordinance, Chapter 24A of the Montgomery County Code. Secondly, this amendment updates the Locational Atlas and Index of Historic Sites in Montgomery County by removing 92 resources which are in ruins, have been demolished, or are located within municipalities outside of the Regional District in Montgomery County. The deletion of these 92 resources from the Locational Atlas will also remove them from further protection under the Historic Preservation Ordinance.

SECTION I

The following resources have been evaluated by the Montgomery County Historic Preservation Commission and have been recommended for designation on the Master Plan for Historic Preservation, thereby extending to them the protection of the County's Historic Preservation Ordinance - Chapter 24A of the Montgomery County Code.

<u>Resource #</u>	<u>Name</u>	<u>Location</u>
14/43	Zachariah MacCubbin Waters House	22005 Foxlair Road Goshen
o	Built c.1817-1820 by Nathaniel Waters, this house was the residence of one of the Goshen area's first dairy farmers. Zachariah MacCubbin Waters, a well-respected member of the community, was born in the house in 1833.	
o	A good example of Federal-style architecture, the four-bay house with brick end chimneys is supplemented by two out-buildings: a stone and frame springhouse and a frame stable.	
o	The environmental setting of the site is the 2.43 acre parcel on which it is located.	
o	A locational map of the Zachariah MacCubbin Waters House is attached (see Figure 1).	
33/9	Shaw House/Quaint Acres	713 Quaint Acres Drive White Oak
o	The Shaw farmhouse, also known as Quaint Acres, is a well-preserved example of a rural vernacular structure that is representative of construction styles in Montgomery County in the mid-19th century. It was built in 1851 by Elbert Shaw.	
o	The property is historically significant for its long association with the Shaw family, one of whose members - Lacy Shaw - played a prominent role in the political and civic development of Montgomery County.	

- o The environmental setting of the site is the 41,714 square foot parcel on which it is located.
- o A locational map of the Shaw House/Quaint Acres is attached (see Figure 2).

SECTION II

The following resources are recommended for removal from the Locational Atlas. These properties do not merit designation on the Master Plan for Historic Preservation for a variety of reasons: they are either in ruins, have been completely demolished, or are located in municipalities that are independent of the Regional District in Montgomery County and, thus, do not fall under the County's zoning and planning authority.

Group A

Ruins/Outbuildings Only - Included in this group are resources which are completely in ruins and have virtually no significant visible fabric remaining, plus resources which have been altered so that the only remaining structures on the property are outbuildings which are neither architecturally nor historically significant.

Group C

Municipalities - Included in this group are resources which are located in municipalities that are independent of the Regional District in Montgomery County and, thus, do not fall under the County's zoning and planning authority. In a number of cases - but not all - the municipalities in which these resources are located have enacted their own historic preservation laws and a number of these properties are designated and protected locally.
